INTELLIGENT VOIP SOLUTIONS AT WORK

OUR GOAL

To Deliver Full Featured, Next Generation IP Telephony Services to End User and Reseller Customers with the Highest Degree of Quality, Value, and Integrity.

ABOUT MIX NETWORKS

Based in Lakeland, Florida, **MIX Networks**, Inc. is a continent-wide VOIP service provider offering a full suite of high-value, next generation VOIP solutions to Business and Reseller Customers at reduced costs.

MIX Network's affiliate companies have been in business since 1994.

Years of experience in the corporate communications environment gave **MIX Networks** a unique starting point and solid ideas about the type of VOIP Services that it would offer to End Users.

Understanding that in a service industry, reliability of service is everything, **MIX Networks** built a strong, redundant end-to-end MPLS VOIP network. The recent implementation of **WebFones** has further enhanced ease of network administration, lending an added degree of stability and flexibility to an already strong network foundation.
