WORLD CLASS PBX FEATURES

The MIX Centrex is a Hosted Virtual PBX System and a model of next generation communications flexibility and scalability.

SOLUTION FOR YOUR NEEDS

Used with MIX Trunx (IP Trunx) and Business Class IP Phones, the MIX Centrex creates a feature-rich communications solution for growing businesses and can establish a world-class corporate image with minimal capital outlay.

MIX Centrex provides all of the functionality of a traditional PBX system while incorporating next-generation calling features at no additional cost.

CREATE A VIRTUAL OFFICE

-No Matter Where Your Workforce Is!

The MIX Centrex allows remote workers or departments to connect to a company's main corporate headquarters, creating a seamless, unified communications environment that callers immediately recognize.

A broadband internet connection is required in order to enable MIX Centrex services.
